

Training Organisation (RTO)

Transport and Logistics

\$500,000

Established in 2003 this business has developed a strong identity through three (3) distinct revenue streams:

- Fee for Service Training
- Government Funded Training
- Warehousing & Storage

The central training / warehouse facility is well established with offices, training classrooms, full amenities and a fully operational and functional warehouse which is accredited by Work Safe for Fork Lift Licensing.

The business has delivered a wide variety of training (38 Quals. on Scope) both on campus and in the work place with GFTP accounting for nearly 80% of the businesses revenue. They provide school based new apprenticeships and workplace training to a variety of external clients.

Other business activities have distracted the owners' attention from this operation and it now offers a new owner an excellent turnaround opportunity. The business has solid sales with good profits and is offering an extensive website, database of accredited trainers and students, a strong admin team.
